Forward-Looking Statements

This presentation includes “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements often include words such as “believe,” “expect,” “anticipate,” “estimate,” and “intend” or future or conditional verbs such as “will,” “would,” “should,” “could,” or “may.” Forward-looking statements are not historical facts but instead represent management’s current expectations and forecast regarding future events many of which are inherently uncertain and outside of our control. Actual results may differ, possibly materially, from those currently expected or projected in these forward-looking statements. Factors that could cause our actual results to differ materially from those described in the forward-looking statements, include expected cost savings, synergies and other financial benefits from acquisitions might not be realized within the expected time frames or at all, and costs or difficulties relating to integration matters might be greater than expected; increased competitive pressures; changes in the interest rate environment; change in general economic conditions and conditions within the securities markets; legislative and regulatory changes and other factors described in HomeTrust’s latest annual Report on Form 10-K and Quarterly Reports on Form 10-Q and other filings with the Securities and Exchange Commission-which are available on our website at www.htb.com and on the SEC’s website at www.sec.gov. Any of the forward-looking statements that we make in this presentation or our SEC filings are based upon management’s beliefs and assumptions at the time they are made and may turn out to be wrong because of inaccurate assumptions we might make, because of the factors illustrated above or because of other factors that we cannot foresee. We do not undertake and specifically disclaim any obligation to revise any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements. These risks could cause our actual results for fiscal 2019 and beyond to differ materially from those expressed in any forward-looking statements by, or on behalf of, us and could negatively affect our operating and stock performance.

Non-GAAP Disclosure Reconciliation

In addition to results presented in accordance with generally accepted accounting principles utilized in the United States ("GAAP"), this presentation contains certain non-GAAP financial measures, which include: the efficiency ratio; tangible book value; tangible book value per share; net income excluding merger-related expenses, certain state income tax expense, adjustments for the change in federal tax law, and gain from the sale of premises and equipment; and earnings per share ("EPS"), return on assets ("ROA"), and return on equity ("ROE") excluding merger-related expenses, certain state income tax expense, adjustments for the change in federal tax law, and gain from the sale of premises and equipment. The Company believes these non-GAAP financial measures and ratios as presented are useful for both investors and management to understand the effects of certain items and provides an alternative view of the Company's performance over time and in comparison to the Company's competitors.

The Company believes these measures facilitate comparison of the quality and composition of the Company's capital and earnings ability over time and in comparison to its competitors. These non-GAAP measures have inherent limitations, are not required to be uniformly applied and are not audited. They should not be considered in isolation or as a substitute for total stockholders' equity or operating results determined in accordance with GAAP. These non-GAAP measures may not be comparable to similarly titled measures reported by other companies.
